

IMAGE RULES

- Entries must originate as photographs (image captures of objects via light sensitivity) made by the entrant on photographic emulsion or acquired digitally.
-
- By virtue of submitting an image, the entrant certifies the work as his or her own and having exposed or created all elements of the final image. Images may not incorporate elements produced by anyone else (for example: clip art, images, or art by others downloaded from the Internet).
-
- A photo of someone else's artwork (for example, a photo from a wall mural or an illustration from a book) is not acceptable.
-
- Entries may not be completely created within the computer and must be based on a photo taken by the maker.
-
- Sky replacement, if permitted, must be captured by the same photographer submitting the image into the competition.
-
- Entries may not include images created in AI-Generated Software.
