Nick Delany bio

I began photography in my teens with a Kodak Instamatic and developed my interest in B&W photography early with my Pentax SP1000. After 40 years of work I returned to my hobby, able to apply more time to learning and travel. I joined VCC on my arrival in Victoria in 2019 and found the club to be an inspiration to learn and try new things. I was fortunate to be the Photographer of the Year at VCC in 2023 and have earned a PPSA certification from the Photographic Society of America by gaining more than 300 acceptances in International Competitions plus over 100 awards. The bulk of my photography has been wildlife either in the Pacific Northwest or Africa but my current passion is B&W Street & Landscape photography. For wildlife photography, my equipment is the Sony A1 or A9 matched with the FE 200-600mm or the FE 70-200mm zoom. For all other genres I use a Leica Q3-43mm and for my B&W images I use a Leica Q2 28mm & M11 Monchrom with 50mm. I have been married to my fellow Club member Kathryn Delany for 40 years and we love to travel to destinations seldom covered by other photographers to seek out new and interesting stories.
